The 780 nm infrared beam of this Topcon rotating laser does the job of grade checking and concrete forming. The machine moves quick without any stops, as the rotational speed of this Topcon machine is 600 RPM. Powered by a NiCad battery, this Topcon rotating laser can incessantly work for 140 hours and above. The Topcon RL-HA measures 8.5 inches in length and 9.5 inches in height.

Topcon RL-HA Level for sale online | eBay
The Topcon RL-H3C is now in calibration mode, to select the “X” axis press the “TILT” button (left button) and the “ON” light will go solid. Press the “MANU” or “Power” buttons to shift the beam up or down to align with your level mark. You can press and hold either of the buttons to move the laser’s height faster.

Lens disorders, and cataract in particular, are the most common cause of reduced vision. Much is now known about the cause, nature and effects of cataract and this book sets out to describe in detail aspects of lens disorders and cataract. The later chapters systematically describe all forms of cataract in morphological order allowing the reader to readily identify the nature of any particular cataract with which they are presented. The book may thus be used as a clinical reference manual. Photographs have been used extensively to illustrate and expand upon the text. The authors, who direct the Clinical Cataract Unit in Oxford, have much experience in conditions of the lens and have the ability to convey their knowledge in an organised and fascinating style. This book will be essential reading for all those with an interest in lens disorders, particularly the clinical ophthalmologist, but also the student, optometrist and workers in the field.
