This book is an update of the Guidelines published in 2001. It sets forth the underlying framework for the Reserves Data Template, and provides operational advice for its use. The updated version also includes three new appendices aimed at assisting member countries in reporting the required data.

In the late 1990s, international statistical experts confirmed that financial derivatives should be treated as financial assets and that transactions in financial derivatives should be reported as separate transactions rather than as integral parts of the values of underlying transactions or of financial assets to which some derivatives are linked as hedges. Therefore, to parallel revisions made to the System of National Accounts (1993), an addendum and amendments to the fifth edition (1993) of the Balance of Payments Manual (BPM5) were prepared and published, in early 2000, as a supplement entitled Financial Derivatives. This supplement comprises two parts. Part I contains a new chapter in which the features of financial derivatives and treatments appropriate for specific derivatives were described. Part II consists of

modifications to those portions of the BPM5 that pertain to financial derivatives. The revisions are shown by means of shading and strikeout. Financial Derivatives is an essential component of the BPM5.

This Guide provides clear, up-to-date guidance on the concepts, definitions, and classifications of the gross external debt of the public and private sectors, and on the sources, compilation techniques, and analytical uses of these data. The Guide supersedes the previous international guidance on external debt statistics available in External Debt: Definition, Statistical Coverage, and Methodology (known as the Gray Book), 1988. The Guide's conceptual framework derives from the System of National Accounts 1993 and the fifth edition of the IMF's Balance of Payments Manual(1993). Preparation of the Guide was undertaken by an Inter-Agency Task Force on Finance Statistics, chaired by the IMF and involving representatives from the BIS, the Commonwealth Secretariat, the European Central Bank, Eurostat, the OECD, the Paris Club Secretariat, UNCTAD, and the World Bank.
