This book is intended to serve as a comprehensive reference on the design and development of diesel engines. It talks about combustion and gas exchange processes with important references to emissions and fuel consumption and descriptions of the design of various parts of an engine, its coolants and lubricants, and emission control and optimization techniques. Some of the topics covered are turbocharging and supercharging, noise and vibrational control, emission and combustion control, and the future of heavy duty diesel engines. This volume will be of interest to researchers and professionals working in this area.

The aim of the book is to be a reference book in automotive technology, as far as automotive chassis (i.e. everything that is inside a vehicle except the engine and the body) is concerned. The book is a result of a decade of work heavily sponsored by the FIAT group (who supplied material, together with other automotive companies, and sponsored the work). The first volume deals with the design of automotive components and the second volume treats the various aspects of the design of a vehicle as a system.

From award-winning musician and composer Warren Ellis comes the unexpected and inspiring story of a piece of chewing gum. Featuring an introduction from Nick Cave. 'Warren has turned this memento, snatched from his idol's piano in a moment of rapture, into a genuine religious artefact.' NICK CAVE 'In praise of meaning-rich relics and magical things. Totally heartwarming project.' MAX PORTER 'A unique study of a fan's devotion, of transcendence and of the artistic vocation - it's got

depth and great warmth. It's a beautiful piece of work.' KEVIN BARRY On Thursday 1 July, 1999, Dr Nina Simone gave a rare performance as part of Nick Cave's Meltdown Festival. After the show, in a state of awe, Warren Ellis crept onto the stage, took Dr Simone's piece of chewed gum from the piano, wrapped it in her stage towel and put it in a Tower Records bag. The gum remained with him for twenty years; a sacred totem, his creative muse, growing in significance with every passing year. In 2019, Cave - his collaborator and great friend - asked Warren if there was anything he could contribute to display in his Stranger Than Kindness exhibition. Warren realised the time had come to release the gum. Together they agreed it should be housed in a glass case like a holy relic. Worrying the gum would be damaged or lost, Warren decided to first have it cast in silver and gold, sparking a chain of events that no one could have predicted, one that would take him back to his childhood and his relationship to found objects. Nina Simone's Gum is about how something so small can form beautiful connections between people. It is a story about the meaning we place on things, on experiences, and how they become imbued with spirituality. It is a celebration of artistic process, friendship, understanding and love.
