Case Studies in Crisis Communication: International Perspectives on Hits and Misses was created to fill the gap for a much-needed textbook in case studies in crisis communication from international perspectives. The events of September 11, 2001, other major world crises, and the ongoing macroeconomic challenges of financial institutions, justify the need for this book. While existing textbooks on the subject focus on U.S. corporate cases, they may not appeal equally to students and practitioners in other countries, hence the need to analyze cases from the United States and from other world regions. The variety and the international focus of the cases, be they environmental, health or management successes or failures, makes this book more appealing to a wider audience. These cases examine socio-cultural issues associated with responding to a variety of crises.

Praise for Outpacing the Competition Patent-Based Business Strategy "Outpacing the Competition provides a useful IP management framework for rapidly evolving and inherently unpredictable R&D environments where companies are partners, customers, and competitors at the same time." — Marshall Phelps, Corporate Vice President for IP Policy & Strategy, Microsoft "Robert Cantrell's book Outpacing the Competition: Patent-Based Business Strategy?should be read by anyone?involved in the practice of litigating or licensing patent rights or policymakers responsible for patent issues. Mr. Cantrell provides a cogent approach for applying decisional methodology and game theory to enhance the utilization and understanding of patent rights." — Bradley J. Olson, Esq., patent attorney, Washington, DC "Robert Cantrell makes a compelling case for using intellectual property as a core for building solid business strategy. He provides a unique and valuable perspective on competitive advantage, as delivered through patent-based business strategy. This is an excellent addition to anyone's business strategy arsenal." — Jeff Hovis, Managing Principal, Product Genesis, Innovation Genesis LLC "Robert truly treats patents and related intellectual property as both a weapon and a shield to help the reader use patents to out-manuever global competitors of all kinds—the low-cost producer, the high-end

innovator, etc. CEOs, attorneys, business and engineering professionals and the like will enjoy the military imagery and flavor provided by Robert. Thanks for clarifying how critical it is to have an understanding of patents in running a truly competitive global business today." – Jos é W. Jimenez, Esq., Chief Intellectual Property Officer, AMS Research Corporation

This book constitutes the refereed proceedings of the Pacific Asia Workshop on Intelligence and Security Informatics, PAISI 2015, held in Ho Chi Minh City, Vietnam, in May 2015 in conjunction with PAKDD 2015, the 19th Pacific-Asia Conference on Knowledge Discovery and Data Mining. The 8 revised full papers presented were carefully reviewed and selected from numerous submissions. Topics of the workshop are information sharing and big data analytics, infrastructure protection and emergency responses, cybercrime and terrorism informatics and analytics, as well as enterprise risk management, IS security and social media analytics. The papers present a significant view on regional data sets and case studies, including online social media and multimedia, fraud deception and text mining.

We welcome you to the proceedings of the 21 International Conference on Database and Expert Systems Applications held in Bilbao. With information and database systems being a central topic of computer science, it was to be expected that the integration of knowledge, information and data is today contributing to the again rapidly increasing attractiveness of this field for researchers and practitioners. Since its foundation in 1990, DEXA has been an annual international conference, located in Europe, which showcases state-of-the-art research activities in these areas. DEXA 2010 continued this tradition and provided a forum for presenting and discussing research results in the area of database and intelligent systems and advanced search topics, applications and practically relevant issues related to these areas. It offered attendees the opportunity to extensively discuss requirements, problems, and solutions in the field in the pleasant atmosphere of the city of Bilbao, which is known for its driving industriousness, its top cultural venues and its rich and inspiring heritage and lifestyle. The University of Deusto with its great educational and research traditions, and the hospitality which the university and the city are so famous for, set the stage for this year's DEXA conference. This volume contains the papers selected for presentation at the DEXA conference.

An annual text which provides suggested solutions to a series of case study type questions on taxation law.

The subject of the use of social media has renewed interest because of the impact that it had on the last U.S. presidential election and the impact that social media networks will have on subsequent elections. As guides in the information world, it is thus important that librarians be well versed in social media. This has called attention to the relevance and urgency of incorporating social media use into the academic library, both as a marketing tool and as an instruction tool. Social Media for Communication and Instruction in Academic Libraries is an essential reference source that offers guidance in using social media in academic libraries and in instruction with a special emphasis on assessment and evidence-based practice. Featuring research on topics such as digital libraries, marketing, and web analytics, this book is ideally designed for librarians, administrators, educators, managers, information technology specialists, professionals, researchers, and students.

For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

Interest in economics is at an all-time high. Among the challenges facing the nation is an economy with rapidly rising unemployment, failures of major businesses and industries, and continued dependence on oil with its wildly fluctuating price. Americans are debating the proper role of the government in company bailouts, the effectiveness of tax cuts versus increased government spending to stimulate the economy, and potential effects of deflation. Economists have dealt with such questions for generations, but they have taken on new meaning and significance. Tackling these questions and encompassing analysis of traditional economic theory and topics as well as those that economists have only more recently addressed, 21st Century Economics: A Reference Handbook is intended to meet the needs of several types of readers. Undergraduate students preparing for exams will find summaries of theory and models in key areas of micro and macroeconomics. Readers interested in learning about economic analysis of an issue as well students embarking on research projects will find introductions to relevant theory and empirical evidence. And economists seeking to learn about extensions of analysis into new areas or about new approaches will benefit from chapters that introduce cutting-edge topics. To make the book accessible to undergraduate students, models have been presented only in graphical format (minimal calculus) and empirical evidence has been summarized in ways that do not require much background in statistics or econometrics. It is thereby hoped that chapters will provide both crucial information and inspiration in a non-threatening, highly readable format.
