project development. The book opens with an accessible guide to the CDM that explains what it is and how it works in both theory and practice with a step-by-step guide for investors, project developers, consultants and Designated National Authorities (DNAs). The book then provides valuable country-by-country market analysis of Latin America with a focus on the electrical sector, renewable energy incentives and the overall investment climate that provides an authoritative guide to the most and least favourable places to develop projects. The final section provides guidance for how to overcome the identified barriers with practical actions for successful project development.

This book presents a range of dynamic programming (DP) techniques applied to the optimization of dynamical systems.

When ten-year-old India Opal Buloni moves to Naomi, Florida, with her preacher father, she doesn't know what to expect - least of all, that she'll adopt Winn-Dixie, a dog she names after the supermarket where they met. Opal is lonely at first, but with such an unusually friendly dog at her side, she makes some unusual friends and discovers she has a whole lot to be thankful for.

This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the “ macro system. ” A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on

delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs. Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12 surveys the literature on simulation

modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows
