Economic indicators explains the meaning and application of the full range of economic indicators. The main sources of data on each indicator are provided and the meaning, interpretation and use of the indicators are explained in detail.

This book investigates the South African business cycle and its links to structural change in the economy. Against the

backdrop of the democratic transition in 1994 and the global financial crisis, the authors study how business cycles in South Africa have changed and how cycles are related to key developments in the financial markets, international trade and business sentiment in the country. By focusing on peaks and troughs in economic activity – so-called ‘turning-point cycles’ – the book links up with the common approach of international policymakers to studying fluctuations in economic activity. The authors also introduce new approaches to measuring phases of the business cycle (to understand slow recoveries after the global crisis), provide comprehensive descriptions to complement quantitative analyses, and utilize new data sources that allow the measurement of economic activity over longer periods. As such, the book provides the first integrated overview of business cycles in an emerging market, providing academics and policymakers with a better understanding of the measurement challenges and drivers of the cycle.

This is South African history as you've never seen it before: a fresh, lively, accessible book recounting fascinating, quirky and unexpected stories about our past. Drawing from seven years of historical research, Max du Preez has collected the richest and most extraordinary tales that he found. There's the story of the Khoikhoi chief who was kidnapped and taken to England in 1610. And of King Moshoeshoe's mercy towards the cannibals who had eaten his beloved grandfather, because killing them would defile his grandfather's grave. There's the story of Boer War general Christiaan de Wet and his brother Piet, who joined the British forces and fought his own people. The stories span the centuries, up to recent times, and take in the variety of South Africa's regions and cultures. The result is a fascinating mosaic of our rich historical heritage. There are plenty of academic histories of South Africa, but this is a book that the general reader will enjoy, and it will appeal to tourists too. It's researched with an investigative journalist's thoroughness, and written in the easy, accessible style that has made Max du Preez's writing so popular.

This paper discusses findings of the Financial System Stability Assessment for South Africa. South Africa's financial sector operates in a challenging economic environment. Despite remarkable progress since the end of apartheid in 1994, South Africa still has one of the world's highest unemployment and income inequality rates. Slow economic growth since 2008 has further aggravated unemployment, real disposable income is stagnant, and households are heavily indebted. Relatively high capital buffers as well as sound regulation and supervision have helped mitigate the risks. Stress tests confirm the capital resiliency of banks and insurance companies to severe shocks but illustrate a vulnerability to liquidity shortfalls.

Ectomycorrhizal symbiosis plays a major role in biodiversity and stability of ecosystems in tropical forests. It is a research imperative in tropical and neotropical forest ecosystems because they contain ecologically and economically important tree species. This book provides an overview of the knowledge of ECM symbioses in tropical and neotropical ecosystem forests. The contents address diversity and function of ectomycorrhiza associated with forest plants, impacts of ectomycorrhiza on

plant diversity and composition, regeneration and dynamics of ecosystems, biomass production in forestry, and adaptation of ectomycorrhiza.
