It is known as the Discworld. It is a flat planet, supported on the backs of four elephants, who in turn stand on the back of the great turtle A'Tuin as it swims majestically through space. And it is quite possibly the funniest place in all of creation. The last thing the wizard Drum Billet did, before Death laid a bony hand on his shoulder, was to pass on his staff of power to the eighth son of an eighth son. Unfortunately for his colleagues in the chauvinistic (not to say misogynistic) world of magic, he failed to check on the new-born baby's sex... Terry Pratchett turns his acute satirical eye on sexual equality and chauvinism in his

hilarious third Discworld novel.

Twoflower was a tourist, the first ever seen on the Discworld. Tourist, Rincewind decided, meant idiot. Somewhere on the frontier between thought and reality exists the Discworld, a parallel time and place which might sound and smell very much like our own, but which looks completely different. It plays by different rules. Certainly it refuses to succumb to the quaint notion that universes are ruled by pure logic and the harmony of numbers. But just because the Disc is different doesn't mean that some things don't stay the same. Its very existence is about to be threatened by a strange new blight: the arrival of the first tourist, upon whose survival rests the peace and prosperity of the land. But if the person charged with maintaining that survival in the face of robbers, mercenaries and, well, Death is a spectacularly inept wizard, a

little logic might turn out to be a very good idea...

Death comes to Mort with an offer he can't refuse -- especially since being dead isn't compulsory. The position of Death's apprentice is everything Mort thought he'd ever wanted, until he discovers that this perfect job can be a killer on his love life.

Commander Sam Vimes of the Ankh-Morpork City Watch had it all. But now he's back in his own rough, tough past without even the clothes he was standing up in when the lightning struck... Living in the past is hard. Dying in the past is incredibly easy. But he must survive, because he has a job to do. He must track down a murderer, teach his younger self how to be a good copper and change the outcome of a bloody rebellion. There's a problem: if he wins, he's got no wife, no

child, no future... A Discworld Tale of One City, with a full chorus of street urchins, ladies of negotiable affection, rebels, secret policemen and other children of the revolution. Truth! Justice! Freedom! And a Hard-boiled Egg!

It isn't much of an island that rises up one moonless night from the depths of the Circle Sea—just a few square miles of silt and some old ruins. Unfortunately, the historically disputed lump of land called Leshp is once again floating directly between Ankh-Morpork and the city of Al-Khali on the coast of Klatch—which is spark enough to ignite that glorious international pastime called "war." Pressed into patriotic service, Commander Sam Vimes thinks he should be leading his loyal watchmen, female watchdwarf, and lady werewolf into battle against local malefactors rather than against uncomfortably well-armed

strangers in the Klatchian desert. But war is, after all, simply the greatest of all crimes—and it's Sir Samuel's sworn duty to seek out criminal masterminds wherever they may be hiding and lock them away before they can do any real damage . . . even the ones on his side.

This is where the dragons went. They lie... not dead, not asleep, but... dormant. And although the space they occupy isn't like normal space, nevertheless they are packed in tightly. They could put you in mind of a can of sardines, if you thought sardines were huge and scaly. And presumably, somewhere, there's a key... GUARDS! GUARDS! is the 8th Discworld novel - and after this, dragons will never be the same again!

The sixth "Discworld" novel. The witches of Discworld, not the most joyful bunch, decide that they must get involved in the politics of the planet. Granny Weatherwax, their obvious choice as spokesperson, finds that life in royal politics is not as simple as it seems.
