Victoria's anti-corruption body has been examining the conduct of the Premier and a senior public servant over their role in controversial deals that benefited the firefighters' union.

Killing animals is common practice, yet it is not morally neutral. The end of animal life is related to many societal and ethical questions and concerns. Questions such as how long should we continue to treat an animal before putting it down? But also the question whether it could be legitimate to kill individual animals for the welfare of the herd or of future generations. The ongoing public and academic discussions on these, and on other well-known questions like those related to the killing of animals for food or for scientific purposes, show that there is no one standard evaluation of animal life. This book is an edited volume that enables the reader to get a grip on that plurality of views with regard to animals. It helps to deal with the many questions related to the end of animal life. The chapters show how the plurality of views on killing animals is related to moral presuppositions by providing a clear

overview of the ethical views on end-of-life decisions. Furthermore, the book contains a number of applied studies of the ethical questions related to killing animals in various practices, including small animal practice, wildlife management, fishing and fish farming, animal experimentation and livestock farming. These chapters can help veterinarians, scientists, students, policy makers and many other professionals working with animals to easily get a good overview of the issues at stake, and may contribute to responsible decision-making with regard to the end of animal life.

Recent postclassical narratology has constructed top-down reading models that often remain blind to the frame-breaking potential of individual literary narratives. Narrative, Interrupted goes beyond the macro framing typical of postclassical narratology and sets out to sketch approaches more sensitive to generic specificities, disturbing details and authorial interference. Unlike the mainstream cognitive approaches or even the emergent unnatural narratology, the articles collected here explore the artifice involved in presenting something ordinary and realistic in literature. The first section of the book deals with anti-dynamic elements such as dialogue, details, private events and literary boredom. The second section, devoted to extensions of cognitive narratology, addresses spatiotemporal oddities and the possibility of non-human narratives. The third section focuses on frame-breaking, fragmentarity and problems of authorship in the works of Vladimir Nabokov. The book presents readings of texts ranging from the novels of Don DeLillo and Thomas Pynchon to the Animal Man comics. The common denominator for the texts discussed is the interruption of the chain of events or of the experiential flow of human-like narrative agents.

You've been to Disney World hundreds of times and can rattle off the entire spiel for the Jungle Cruise from memory, but how much do you really know about these imaginative theme parks and their attractions? From the fastest rides and the tallest sculptures to the parks' enchanting history and hidden gems, this trivia challenge doesn't miss a single detail--no matter how small. Full of Disney's best-kept secrets and facts, you will spend hours racking your brain trying to figure out answers to fascinating questions such as, "How many ghosts are said to inhabit the Haunted Mansion?" and "Which Disney attraction was the first to exit directly into a gift shop?" Orangutans swing from Kevlar-lined fire hoses. Giraffes feast on celebratory birthday cakes topped with carrots instead of candles. Hi-tech dinosaur robots growl among steel trees, while owls watch animated cartoons on old television sets. In *American Zoo*, sociologist David Grazian takes us on a safari through the contemporary zoo, alive with its many contradictions and strange wonders. Trading in his tweed jacket for a zoo uniform and a pair of muddy work boots, Grazian introduces us to zookeepers and animal rights activists, parents and toddlers, and the other human primates that make up the zoo's social world. He shows that in a major shift away from their unfortunate pasts, American zoos today emphasize naturalistic exhibits teeming with lush and immersive landscapes, breeding programs for endangered animals, and enrichment activities for their captive creatures. In doing so, zoos blur the imaginary boundaries we regularly use to separate culture from nature, humans from animals, and civilization from the wild. At the same time, zoos manage a wilderness of competing priorities—animal care, education, scientific research, and recreation—all while attempting to serve as centers for conservation in the wake of the current environmental and climate-change crisis. The world of the zoo reflects how we project our own prejudices and desires onto the animal kingdom, and invest nature with meaning and sentiment. A revealing portrayal of comic animals, delighted children, and feisty zookeepers, *American Zoo* is a remarkable close-up exploration of a classic cultural attraction.
