kill” practices that narrow learning so that students will pass an exam. Instead, authors Maureen Connolly and Vicky Giouroukakis present a lesson planning approach for the secondary classroom that generates test success as a byproduct of comprehensive literacy learning. After a comparative analysis of how current ELA assessments measure literacy, they model a backward design-based process for using these test items as a tool to create engaging and effective instruction. With 6 sample lessons, 42 instructional techniques, and tips for differentiation, this practical resource will

empower you to help the students you love become capable, literate individuals who are also well-prepared to ace high-stakes tests.

The study of medicine and healing traditions is well developed in the discipline of anthropology. Most religious studies scholars, however, continue to assume that "medicine" and "biomedicine" are one and the same and that when religion and medicine are mentioned together, the reference is necessarily either to faith healing or bioethics. Scholars of religion also have tended to assume that religious healing

refers to the practices of only a few groups, such as Christian Scientists and pentecostals. Most are now aware of the work of physicians who attempt to demonstrate positive health outcomes in relation to religious practice, but few seem to realize the myriad ways in which healing pervades virtually all religious systems. This volume is designed to help instructors incorporate discussion of healing into their courses and to encourage the development of courses focused on religion and healing. It brings together essays by leading experts in a range of disciplines and addresses the role of
