Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This work challenges the popular view that globalization threatens the role of the nation-state in determining national policy. It examines the fundamental issue of competitiveness and market power in an increasingly borderless and co-dependent world. Despite this increased threat to the nation-state as an effective manager of the national economy, the authors argue that there are a number of options and alternatives open to governments to protect themselves from the global business cycle.
