For Spring Break 2014 we visited Southern Illinois and St Louis. One of the must see sights in St Louis is the St Louis Arch, and I made sure that we were able to get tickets to get Luca to the top.In order to create the Arch on this page I used my Gypsy to create two partial ellipses to be cut out by my Cricut Machine.

Written by an educator, Much More Than a Learning Center presents a fun and educational method for setting up your Kindergarten classroom and creating activities to bring success to each and every student. Described by one of her principals as a "beehive of activity", this exciting system was developed by the author and teacher, Ruth Prevost. The book begins by clearly explaining how to set up the room and how to easily arrange and mix the students each day so everyone has the occasion to work with each of their classmates. The students not only receive in-depth studies in all the basics, but they also have many opportunities to dig deeper into activities they enjoy. In the lessons, the author includes her personal experiences of living overseas, travels, and her love of science. The entire year is conveniently presented in a chart that can be used as your lesson plans for the year or you can use the system's flexibility to include your own experiences and needs. Each activity is explained in simple terms and is supported with clear detailed illustrations. This system gives the teacher more time to work with the students individually as well as in groups, and it allows the children to learn at their own rate in a non-threatening environment because they know the routine, are relaxed, and have fun while learning.

Science explains everything! Science is fun! An extension of an action-packed visit to the Saint Louis Science Center, Bringing Science to Life will entertain and educate kids of all ages. Patricia Corrigan fills its pages with activities, games, hands-on experiments, word definitions, fun facts, short profiles of actual scientists and their jobs, and many other elements. Corrigan connects the world of science not only to the Saint Louis Science Center, but also to the movers and shakers of science throughout the region.

The complete beginner's guide to DSLR photography It doesn't matter if your camera says Canon, Nikon, or Sony on the outside. If a passion for photography is on your inside, this all-encompassing guide will be your new best friend. Set the right exposure in any situation Know when to use flash and when to turn it off Edit your images into masterpieces Take better photos of people and places Get ready to develop your photographer's eye and start snapping shots like the pros.

The first Digital Enterprise Technology (DET) International Conference was held in Durham, UK in 2002 and the second DET Conference in Seattle, USA in 2004. Sponsored by CIRP (College International pour la Recherche en Productique), the third DET Conference took place in Setúbal, Portugal in 2006. Digital Enterprise Technology: Perspectives and Future Challenges is an edited volume based on this conference. Topics include: distributed and collaborative design, process modeling and process planning, advanced factory equipment and layout design and modeling, physical-to-digital environment integrators, enterprise integration technologies, and entrepreneurship in DET.

William S. Burroughs Cutting Up the Century is the definitive book on Burroughs's overarching cut-up project and its relevance to the American twentieth century. Burroughs's Nova Trilogy (The Soft Machine, Nova Express, and The Ticket That Exploded) remains the best-known of his textual cut-up creations, but he committed more than a decade of his life to searching out multimedia for use in works of collage. By cutting up, folding in, and splicing together newspapers, magazines, letters, book reviews, classical literature, audio recordings, photographs, and films, Burroughs created an eclectic and wide-ranging countercultural archive. This collection includes previously unpublished work by Burroughs such as cut-ups of work written by his son, cut-ups of critical responses to his own work, collages on the Vietnam War and the Watergate scandal, excerpts from his dream journals, and some of the few diary entries that Burroughs wrote about his wife, Joan. William S. Burroughs Cutting Up the Century also features original essays, interviews, and discussions by established Burroughs scholars, respected artists, and people who encountered Burroughs. The essays consider Burroughs from a range of starting pointsliterary studies, media studies, popular culture, gender studies, post-colonialism, history, and geography. Ultimately, the collection situates Burroughs as a central artist and thinker of his time and considers his insights on political and social problems that have become even more dire in ours.

This volume contains papers presented at the 11th International Conference on Jet Cutting Technology, held at St. Andrews, Scotland, on 8-10 September 1992. Jetting techniques have been successfully applied for many years in the field of cleaning and descaling. Today, however, jet cutting is used in operations as diverse as removing cancerous growths from the human body, decommissioning sunsea installations and disabling explosive munitions. The diversity is reflected in the papers presented at the conference. The papers were divided into several main sections: jetting basics -- materials; jetting basics -- fluid mechanics; mining and quarrying; civil engineering; new developments; petrochem; cleaning and surface treatment; and manufacturing. The high quality of papers presented at the conference has further reinforced its position as the premier event in the field. The volume will be of interest to researchers, developers and manufacturers of systems, equipment users and contractors.
