The definitive guide to measurement and estimating using NRM1, written by the author of NRM1 The 'RICS New rules of measurement: Order of cost estimating and cost planning of capital building works' (referred to as NRM1) is the cornerstone of good cost management of capital building works projects - enabling more effective and accurate cost advice to be given to clients and other project team members, while facilitating better cost control. The NRM1 Cost Management Handbook is the essential guide to how to successfully interpret and apply these rules, including explanations of how to: quantify building works and prepare order of cost estimates and cost plans use the rules as a toolkit for risk management and procurement analyse actual costs for the purpose of collecting benchmark data and preparing cost analyses capture historical cost data for future order of cost estimates and elemental cost plans employ the rules to aid communication manage the complete 'cost management cycle' use the elemental breakdown and cost structures, together with the coding system developed for NRM1, to effectively

integrate cost management with Building Information Modelling (BIM). In the NRM1 Cost Management Handbook, David Bengé explains in clear terms how NRM1 is meant to be used in familiar quantity surveying tasks, as well as a range of activities of crucial importance for professionals in years to come. Worked examples, flow charts, diagrams, templates and check lists ensure readers of all levels will become confident and competent in the use of NRM1. This book is essential reading for anyone working with NRM1, and is the most authoritative guide to practice available for those preparing to join the industry.

Sustainability in the Hospitality Industry, Third Edition, is the only book available to introduce students to economic, environmental and socially sustainable issues specifically facing the industry as well as exploring ideas, solutions and strategies of how to manage operations in a sustainable way. Since the second edition of this book, there have been many important developments in this field and this latest edition has been updated in the following ways: Updated content including sustainable food systems, hotel energy solutions, impacts of technology, water and food waste management, green hotel design, certification and ecolabelling systems and the evolving nature of corporate social responsibility strategies. New chapters exploring environmental accounting and the internalization of externalities as well as the management of accessibility in hospitality. Updated and new international case studies with reflective questions throughout to explore key issues and show real-life operational responses to sustainability within the hospitality industry. This accessible and comprehensive account of Sustainability in the Hospitality Industry is essential reading for all students and future managers in the hospitality industry.

FUTURE OF THE PAST The historical events in the early centuries of the Srivijaya kingdom that ruled over Malay Archipelago and the arrival of colonising nations afterwards are examples of the region's interlinked past. It forged a historic root for cooperation within the countries in the region now under ASEAN. Consideration about the region's past record is what strongly tugged our editorial team's thoughts. History—or we could say the “past”—inevitably constructs the present and, consequently, our future. As we asked some of the people in the architectural practice regarding the role of the past, many hold that the past is an important aspect that we could learn from to live our present life. **ARCHINESIA** Bookgazine features built projects curated by our team. Among the projects, we look at the use of traditional building materials in Katamama Hotel by andramatin and the House in Cornwall Garden by CHANG Architects which belongs to a family of many generations. Can we take the past as something that bounds us, or builds us? We leave it for the reader to decide. **BUILT PROJECTS** Andrew Bloomberg of Aedas : Sandcrawler, Singapore Studio Tonton : Stacking House, Indonesia Andramatin : Katamama Suites K2LD Architects : Rebecca Residence, Singapore Imelda Akmal : Songket House, Padang K2LD Architects : Christ Methodist Church Atelier Riri : Container Dwelling Chang Architects : House in Cornwall Gardens, Singapore Arte Architects & Associates : Bisma Eight, Bali Andramatin : MW House, Semarang Pencil Office : Hut House, Singapore IndraTata Adilaras : Plaza harmoni

Prepared by the largest environmental engineering firm in the U.S., this manual explains how to avoid errors in design, construction, or operation of large-scale facilities which in hot, humid climates can lead to critical building failure. Key issues covered include indoor air quality problem factors, climate considerations, new building failure, and a building model which examines possible problems throughout the construction process.

Section 1: Key Issues Section 2: Schematic Design Section 3: Design Development Section 4: Final Design Section 5: Construction Section 6: Post-Construction Startup and System Commissioning Section 7: Works Cited

This book covers various current and emerging topics in construction management and real estate. Papers selected in this book cover a wide variety of topics such as new-type urbanization, planning and construction of smart city and eco-city, urban-rural infrastructure development, land use and development, housing market and housing policy, new theory and practice of construction project management, big data application, smart construction and BIM, international construction (i.e., belt and road project), green building, off-site prefabrication, rural rejuvenation and eco-civilization and other topics related to construction management and real estate. These papers provide useful references to both scholars and practitioners. This book is the documentation of the 24th International Symposium on Advancement of Construction Management and Real Estate, which was held in Chongqing, China.

According to a report released by the Water Infrastructure Network (WIN), over the next 20 years America's water and wastewater systems will have to invest an additional \$20 billion a year to replace aging and failing infrastructure in order to comply with the national environmental and public health priorities in the Clean Water Act and Safe Drink
