The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as 'international', 'global' and 'multicultural' are being re-evaluated. Fully updated and revised, and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia, and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key contemporary developments, including: internationalism in the context of teaching and learning leadership, standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education, including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.

Written by an expert author team consisting of former IB chief examiners, senior examiners and assistant examiners, experienced IB workshop leaders, and teachers with more than 160 years of combined teaching experience.

This title forms part of the completely new Mathematics for the IB Diploma series. This highly illustrated coursebook, available in both print and e-book formats, has been written to specifically cover the new IB Higher Level syllabus. Based on the new group 5 aims, the progressive approach encourages cumulative learning. Features include: a dedicated chapter exclusively for combined exercises; plenty of worked examples; questions colour-coded according to grade; exam-style questions; feature boxes of hints and tips. The print book includes a CD-ROM providing a complete e-version of the book, all the options chapters, extension worksheets, prior learning sheets, calculator skills sheets and fill-in proofs. These additional materials are also included in the e-book version.

This comprehensive and concise text is ideal for use with the International Baccalaureate Mathematics HL & SL courses in a clear and easy to use format. The author has developed this text after many years of teaching and examining IB Mathematics. This 2006-13 Edition of Mathematics HL & SL has been written specifically for the International Baccalaureate Syllabuses for students taking exams until November 2013. Students taking exams in May 2014 or later should buy the 2012-19 Edition instead of this one. The HL Options of Statistics and Probability, Set, Relations and Groups, and Series and Differential Equations are included. In each chapter the information relative to the topic is discussed and several examples providing various approaches to the solutions are given. The exercises provided with each section have been carefully graded from the relatively easy to the more difficult. Answers to all odd-numbered questions and some even-numbered ones are provided. The required outcomes are featured at the end of each chapter.

"Neutrosophic Sets and Systems" has been created for publications on advanced studies in neutrosophy, neutrosophic set, neutrosophic logic, neutrosophic probability, neutrosophic statistics that started in 1995 and their applications in any field, such as the neutrosophic structures developed in algebra, geometry, topology, etc.

There are currently more than 3600 IB World Schools and this number is growing annually. The IB World Schools Yearbook is the official guide to schools authorised to offer the International Baccalaureate Primary Years, Middle Years Diploma and Programmes. It tells you where the schools are and what they offer, and provides up-to-date information about the IB programmes and the International Baccalaureate. This is an ideal reference for schools administration, parents and education ministries worldwide as it provides a comprehensive reference of IB World Schools for quick and easy access raises the profile of schools within the IB World School community, and beyond reinforces a sense of belonging to the IB World School community

Do you have students who are far ahead of their peers in math? Are you a teacher who differentiates for those students by giving them additional topics, but without knowing what topics they have already covered over the past years and without a plan for the topics they should cover in the next years? Are you a head of department, who wants to streamline differentiation throughout your math department to ensure talented students have a more uniform experience as they move from teacher to teacher and have a goal they are working towards year after year? Are you a principal who wants to improve the results of your students in HL Math and to have students from your school start succeeding in HL Further Math? If so, this book describes a program to prepare IB Middle Years Program (MYP) students to enter the Diploma Program (DP) taking HL Further Math as their only math course. The program is modeled on the ATYP program from Kalamazoo MI started by Carol McCarthy.
