The internationally bestselling book featuring the stuffed-animal cuteness of social media 's favorite Pomeranian, one of the first-ever viral sensations. Everyone loved Boo! His signature fluffy head and teddy bear like persona were irresistibly adorable. With millions of Facebook fans, Boo became an international superstar. This charming book features exclusive photographs of Boo doing all his favorite things: lounging around, playing with friends, exploring the whole wide world, and making those famous puppy-dog eyes. To know Boo was to love him, and this book is for anyone who loved the cutest dog ever.

One of the first champions of the positive effects of gaming reveals the dark side of today's digital and social media Today's schools are eager to use the latest technology in the classroom, but rather than improving learning, the new e-media can just as easily narrow students' horizons. Education innovator James Paul Gee first documented the educational benefits of gaming a decade ago in his classic *What Video Games Have to Teach Us About Learning and Literacy*. Now, with digital and social media at the center of modern life, he issues an important warning that groundbreaking new technologies, far from revolutionizing schooling, can stymie the next generation's ability to resolve deep global challenges. The

solution-and perhaps our children's future-lies in what Gee calls synchronized intelligence, a way of organizing people and their digital tools to solve problems, produce knowledge, and allow people to count and contribute. Gee explores important strategies and tools for today's parents, educators, and policy makers, including virtual worlds, artificial tutors, and ways to create collective intelligence where everyday people can solve hard problems. By harnessing the power of human creativity with interactional and technological sophistication we can finally overcome the limitations of today's failing educational system and solve problems in our high-risk global world. The Anti-Education Era is a powerful and important call to reshape digital learning, engage children in a meaningful educational experience, and bridge inequality.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L

systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

When Mona Gallo finds herself accidentally pregnant, the life she worked so hard to build begins crumbling around her. Although she's determined to raise the baby on her own, she finds herself inexplicably drawn to her sexy boss despite his rakish ways. Maybe it's just hormones but Mona can't seem to help herself when it comes to Reno. She should know better, of course. She's been a stripper for half her life and seen first hand how letting down her guard only leads to heartache. Vincent "Reno" O'Keefe's life is falling apart. He lives three thousand miles away from his family, dates all the wrong women, is a terrible Catholic, and his fortieth birthday is around the corner. Now, his little sister has announced her engagement and he can't bear to go to the wedding alone. Asking Mona seems like the perfect solution. She's newly single, gorgeous, and in desperate need of a vacation. Mona is eager to see Boston and enjoy one last trip before the baby comes. She can hide a pregnancy for a week, right? Besides, what's the worst that could happen...?
