Electronic Health Records

Hamilton, Electronic Health Records, 3e is the top choice for training students using live and up-to-date SpringCharts EHR software. Electronic Health Records 3e builds transferable medical documentation skills with a variety of exercises that walk students through different facets of using an EHR in the medical office. As students progress through SpringCharts, they learn to gather patient information, schedule appointments, record examination information, process lab tests, select codes, and more. Students who complete this course will learn the appropriate terminology and skills to use any EHR software program with minimal additional training. The practical, systematic approach is based on real-world medical office activities.

Integrated Electronic Health Records: An Online Course and Worktext for Greenway Medical Technologies' PrimeSUITE®. This hands-on course is offered as an online integrated EHR and practice management program through McGraw-Hill's Connect Plus. Connect Plus uses the latest technology to better connect professors to their students, and students to the information and customized resources they need to master a subject. It includes a variety of digital learning tools that enable professors to easily customize courses and allow students to learn and master content and succeed in the course. Here's what you can expect from the Worktext: -An introduction to Greenway Medical Technologies' PrimeSUITE, an ONC-ATCB-Certified online EHR and practice management interoperable solution. The book covers the key topics for EHR including Meaningful Use Stage 2 and ICD-10, with simulated PrimeSUITE exercises in Connect Plus as the vehicle to demonstrate those topics. Attention is paid to providing the "why" behind each task so that the reader can accumulate transferable skills. -Updated content that will be appealing to HIM programs, HIT programs, MIBC programs and more. All exercises are designated with PM, EHR, HIM tags, or some combination of those three. The second edition has additional simulated PrimeSUITE exercises, including Applying Your Skills exercises.

Developed as a comprehensive learning resource, this hands-on course for Integrated Electronic Health Records is offered through McGraw Hill's Connect. Connect uses the latest technology and learning techniques to better connect professors to their students, and students to the information and customized resources they need to master a subject. Both the worktext and the online course include coverage of EHRclinic, an education-based EHR solution for online electronic health records, practice management applications, and interoperable physician-based functionality. EHRclinic will be used to demonstrate the key applications of electronic health records. Attention is paid to providing the "why" behind each task, so that the reader can accumulate transferable skills. The coverage is focused on using an EHR program in a doctor's office, while providing additional information on how tasks might also be completed in a hospital setting.

Electronic Health Records

Integrated Electronic Health Records: An Online Course and Worktext for Greenway Medical Technologies' PrimeSUITE®. Developed as a comprehensive learning resource, this hands-on course is offered through McGraw-Hill's Connect Plus. Connect Plus uses the latest technology and adaptive learning techniques to better connect professors to their students, and students to the information and customized resources they need to master a subject. It includes a variety of digital learning tools that enable professors to easily customize courses and allow students to learn and master content and succeed in the course. Here's what you can expect from the Worktext: -A book meant to complement the online Connect Plus course, written by an author with an extensive HIM/HIT background—Beth Shanholtzer, MAEd, RHIA. -Coverage of Greenway Medical Technologies' PrimeSUITE, an ONC-ATCB-Certified, fully-integrated, online EHR, PM and interoperability solution. The book is not meant to be an extensive user manual for PrimeSUITE, but rather it covers the key topics for EHR, with PrimeSUITE as the vehicle to demonstrate those topics. Attention is paid to providing the "why" behind each task so that the reader can accumulate transferable skills. -Content that will be appealing to HIM programs, HIT programs, MIBC programs and more. All exercises are designated with PM, EHR, HIM tags, or some combination of those three. Instructors can access a correlation of the Worktext's Learning Outcomes to the key accrediting bodies such as CAHIM, ABHES and CAAHEP via the book's website, www.mhhe.com/greenway.

"more opportunities for people who want to work in non-clinical health professions. From the front office staff to nurses, doctors, health information professionals, coders, and every worker in between, understanding how health information is transferred and how that information can improve the quality of healthcare is a valuable skill. Those working in healthcare settings will be impacted by electronic health records as they complete their daily tasks. Developed as a comprehensive learning resource, this hands-on course for Integrated Electronic Health Records is offered through McGraw-Hill's Connect. Connect uses the latest technology and learning techniques to better connect professors to their students, and students to the information and customized resources they need to master a subject. Integrated Electronic Health Records complements the online Connect course and is written by authors with extensive backgrounds in health information management/health information technology in the case of M. Beth Shanholtzer, MAEd, FAHIMA, RHIA, and clinical/administrative medical assisting in the case of Amy Ensign, MBA, BHSA, CMA (AAMA), RMA (AMT). Both the worktext and the online course include coverage of EHRclinic, an education-based EHR solution for online electronic health records, practice management applications, and interoperable physician-based functionality. EHRclinic will be used to demonstrate the key applications of electronic health records. Attention is paid to providing the "why" behind each task, so that the reader can accumulate transferable skills. The coverage is focused on using an HER program in a doctor's office, while providing additional information on how tasks might also be completed in a hospital setting. Electronic health records impact a variety of programs in the health professions; thus, this content will be relevant to health information management, health information technology, medical insurance, billing and coding, and medical assisting programs"--

Technology is changing the qualifications required to perform both clinical and administrative allied health duties. Students entering the job market today must be familiar with the ways in which technology is used to perform on-the-job tasks. In particular, the understanding of electronic health records is essential. This text integrates the presentation of concepts with the opportunity to gain hands-on experience working with a simulated EHR software, Practice Partner. The subject matter is presented in a logical order, proceeding from introductory material to coverage of specific features and functions of EHRs. After describing the need for EHRs, the text explains the basic purpose and content of an EHR system. With that knowledge in place, the subject moves to the topic of the information technology used in EHR systems. The need to ensure the privacy and security of the information in an EHR is emphasized.
