The teacher guide accompanies the student activities books in macro and microeconomics for teaching collegelevel economics in AP Economics courses. The publication contains course outlines, unit plans, teaching instructions, and answers to the student activities and sample tests.

Contains 10 lessons that reintroduce an ethical dimension to economics. Students will learn about the important role ethics and character play in a market economy and how, in turn, markets influence ethical behavior.

Bringing Home the Gold contains 22 activitybased lessons for high school students. Students make important financial decisions about earning an income, saving and spending, using credit and budgeting. This publication contains instructions for teaching the lessons.

Designed to assist high school teachers to teach undergraduate principles of economics courses to high school students as part of the Advanced Placement (AP) Program of the College Board.

After strong growth in 2017 and early 2018, global economic activity slowed notably in the second half of last year, reflecting a confluence of factors affecting major economies. China's growth declined

following a combination of needed regulatory tightening to rein in shadow banking and an increase in trade tensions with the United States. The euro area economy lost more momentum than expected as consumer and business confidence weakened and car production in Germany was disrupted by the introduction of new emission standards; investment dropped in Italy as sovereign spreads widened; and external demand, especially from emerging Asia, softened. Elsewhere, natural disasters hurt activity in Japan. Trade tensions increasingly took a toll on business confidence and, so, financial market sentiment worsened, with financial conditions tightening for vulnerable emerging markets in the spring of 2018 and then in advanced economies later in the year, weighing on global demand. Conditions have eased in 2019 as the US Federal Reserve signaled a more accommodative monetary policy stance and markets became more optimistic about a US–China trade deal, but they remain slightly more restrictive than in the fall.

Lesson plans for teaching about the US stock market to students in grades 4-12. May be used alone or as a companion to the The Stock Market Game.
