research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings

The book focuses on how leaders are learning to develop the creative capabilities of their team members and themselves. Through this learning, teams are developing original approaches to their work, benefitting their customers, patients, employees and other stakeholders. Using a strong interdisciplinary approach, *How Leaders Learn to Boost Creativity in Teams* introduces insights from the domains of psychology, creativity, leadership and power, and integrates these through a proposed framework for

leading innovation. It contains nine in-depth, current-day cases of learning and workplace-based applications and has an optimistic message: creativity can be learnt. Making connections between current day research, learning and application in work contexts, it will appeal to leaders and students alike seeking to think outside of the box.
