of glucose (sugar) in fresh capillary whole blood. The OneTouch ® Ultra 2 System is intended for use outside the body (in vitro diagnostic use) by people with diabetes at home and by health care professionals in a clinical setting as an aid to monitor the effectiveness of diabetes control. It should not be used for the diagnosis of diabetes or for testing newborns. Test principle

Blood Glucose Monitoring System USER GUIDE - One Touch
To perform a control test: 1. Apply a drop of One Touch Ultra control solution to the test strip instead of a drop of blood. 2. Compare the results to the control range (you can find the range on the side of the vial of test strips) 3. If the results are inside the range printed on the vial, your meter is functioning correctly.

A condensed, student-friendly version of Tietz Textbook of Clinical Chemistry, this text uses a laboratory perspective to provide you with the chemistry fundamentals you need to work in a real-world, clinical lab. Accurate chemical structures are included to explain the key chemical features of relevant molecules. Offering complete, accurate coverage of key topics in the field, it's everything that you expect from the Tietz name! More than 500 illustrations and easy-to-read tables help you understand and remember key concepts. Key words, learning objectives, and other student-friendly features reinforce important material. Chapter review questions are included in an appendix to test your knowledge. A two-color design makes it easier to read and easy to find important topics. In-depth, reader-friendly content is appropriate for MT/CLS and MLT/CLT students and may also be used by laboratory practitioners, pathology residents, and others. A new chapter on newborn screening discusses the basic principles, screening recommendations, inborn errors, methods, and interpretation of results. A comprehensive glossary provides easy-to-find definitions of key terms. An Evolve website provides regular updates of content, answers to review questions, and web links to related sites for further research and study.

The second edition features a great deal of new information for the general population as well as for people with diabetes, including the risk factors implicated in the development of diabetes and, especially, the prevention of Type 2 diabetes.

Whether you're newly diagnosed with diabetes, or a friend or relative of yours has been diagnosed with the disease, this book offers help. 100 Questions & Answers About Diabetes is a timely, authoritative resource for anyone coping with the physical and emotional turmoil of this disease.

This book is a printed edition of the Special Issue "Dietary Antioxidants and Prevention of Non-Communicable Diseases" that was published in Antioxidants
