ESPRIT Project 322,  
"CAD Interfaces", has  
been established to  
define the most  
important interfaces in  
CAD/CAM systems for  
data exchange, data  
base, finite element  
analysis, experimental  
analysis, and advanced  
modeling. The  
definitions of these

# Bookmark File PDF Post

interfaces are being elaborated in harmony with international standardization efforts in this field. One principal goal of the project is to develop techniques for the exchange of CAD information between CAD systems, and from the CAD domain to CAA (Computer Aided Analysis) and CAM

# Bookmark File PDF Post

(Computer Aided Manufacturing). This volume presents a proposal for a neutral file format for CAD data: curves, surfaces, and solids. The specification is based on a reference schema for CAD data bases and is defined informally with respect to its semantics and formally with respect to its syntax.

# Bookmark File PDF Post

This volume is a revised edition of "Specification of a CAD\*I Neutral File for Solids" Version 3.2.

The revision reflects the enhancements which result from the implementation of communication processors in eight different CAD systems and from the practical exchange of solid models between these

# Bookmark File

## PDF Post

systems. Due to the close interaction between the CAD\*I project and the coming-up international standard STEP this specification also serves as an introduction to the geometry model that will be included in the future international standard.
