This exciting new textbook for introductory psychology helps to open students' minds to the idea that psychology is all around us. Authors RON COMER and LIZ GOULD encourage students to examine what they know about human behaviour and how they know it; and open them up to an appreciation of psychology outside of the classroom. Psychology Around Us helps students see the big picture by stressing the interconnected nature of psychological science. Almost every chapter within this first edition helps open students' minds to comprehend the big picture with sections that highlight how the different fields of psychology are connected to each other and how they connect to everyday life. This text highlights human development, brain function, abnormal psychology, and the individual differences in each area as cut-across themes to demonstrate these connections. Also included are two-page art spreads to demonstrate exactly What Happens In The Brain When we engage in everyday activities such as eat pizza, study psychology, or listen to music. The art featured in these spreads have been created especially for Psychology Around Us by an award-winning artist with input from faculty on how it will contribute to teaching and learning. Features: Cut Across Connections -

updated third edition, the book offers a complete guide to the background knowledge, practical techniques and professional skills required to become a successful medical practitioner working in sport. Well illustrated, with clear step-by-step guidance, plus text boxes and checklists for quick reference, the Team Physician Manual covers every key area of activity and intervention, from the preparticipation examination to rehabilitation. The book surveys every classification of sports injury, offering clear advice on fieldside assessment, diagnosis and treatment, as well as examining best practice in general aspects of sports medicine, such as prevention and the psychology of injury. Written by a team of world-leading physicians from North and South America, Europe, Africa and Asia, this book is a 'must have' reference for any doctor, physical therapist, or medical professional working in sport.

«Facade Construction Manual» provides a systematic survey of contemporary expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types.

A real boon for medical practitioners from a number of disciplines, this is a practice-oriented manual of medical oncology and hematology for day-to-day use in caring for patients' hematologic and neoplastic diseases. It is founded on the longstanding experience of a large specialized university department accustomed to having to provide reliable advice in a broad range of circumstances. The authors have chosen not to give a comprehensive review of the various subjects but have instead focused on practical methods which have proven to be useful in their experience, with special emphasis on standardizing chemotherapy protocols.

This third edition manual provides a comprehensive, insightful, evidenced-based review of general surgical oncology and serves as a valuable resource for general surgeons in training, practicing general surgeons, and surgical oncologists. The volume describes a multidisciplinary approach that integrates clinical, radiologic, and pathologic data in formulating practical clinical management, and offers a practical approach to the most common situations when treating cancer patients. Each chapter focuses on an individual malignancy and describes the presentation of the malignancy,

integrated management based on stage, landmark trials, and suggestions for who to discuss at multidisciplinary cancer conferences. Multiple tables in each chapter provide a concise yet comprehensive summary of the current status of the field. Clinical “pearls” or tips and tricks from high volume surgeons at the University of Toronto are also discussed. The third edition of the Surgical Oncology Manual will serve as a critical resource for general surgeons in training and practicing surgeons dealing with this challenging field.
