You will also develop the business communication skills required for anyone in the global economy. This includes topics like delivering presentations, writing emails, or speaking in meetings. This gives you the ability to communicate across departments with a strong ability in reading, writing, speaking, and listening.

Take-Off: Technical English for Engineering Course Book Take-Off has been designed for non-native speakers of English who are studying Engineering NVQ Level 2 and above. The aeronautical context is particularly aimed at technicians and engineers who are going on to work in the aeronautics industry. Take-Off is an ESP course for intermediate-level students. Unlike many ESP courses, it teaches genuine transferable skills and is ideal for students who need to further their technical training in English. The focus is on skills development, using relevant contexts, with grammar taking a strong supporting role. Reading and listening development is dealt with in the context of understanding instructions and information in technical manuals. Students develop the speaking skills of asking for and giving factual information, and the writing skills necessary to complete workplace documentation, such as accident reports and safety assessments. Take-Off uses a communicative methodology, with graded tasks that are careful scaffolded to involve and motivate the students, providing them with a clear sense of achievement. The wide variety of texts and task types will appeal to a broad range of ages and nationalities. There are also comprehensive word lists and a glossary of terms for student reference. A bank of tests are provided online. Please contact us if you have purchased the book and would like access to these tests. Key Features Practical skills developed for dealing with oral and written instructions and documentation Task-based approach ensures achievable lesson outcomes Variety of texts and tasks on a wide range of aeronautical topics Two review sections to consolidate skills and vocabulary knowledge Glossary and electrical appendix Audio CDs for further self-study and homework Accompanying Workbook, Teacher's Book and Interactive Media Book also available.

Technical English Level 1 covers the core language and skills that students need to communicate successfully in all technical and industrial specifications.

Authored by a qualified engineer with professional experience in both engineering and English language teaching, the book covers essential technical English vocabulary in context. Over 1000 words and phrases are presented to help engineers or engineering students better communicate in English on the job, using a format designed to make self-study more intuitive-- words and expressions are explained on the left-hand pages, and practice activities are on the right hand pages. Suitable for Upper Intermediate level learners of English (CEF B1-B2).

**Technical English: Course Book** This course has been designed for learners who will be using English in a scientific or engineering environment. Technical English introduces the vocabulary necessary to communicate and understand basic technical concepts in fields such as algebra, geometry, chemistry and physics. Each unit presents vocabulary related to a specific technical area, and reviews one relevant grammar point that will help students to express themselves with confidence. The approach taken in this course is direct and concise, and you will be encouraged to work both independently and with others on an extensive range of activities, all of which are geared towards making you more proficient in the technical language you will need to be successful in further study. Key features of the course include: 21 units covering a wide range of technical themes a variety of authentic source materials such as instruction manuals and scientific articles a range of listening texts, including lectures and dialogues transferable reading and listening skills with grammar for clarification and support authentic tasks designed to promote transferable skills 500 basic technical words full-colour 106-page Course Book complete with audio CD/cassette Teacher's Book with lesson-by-lesson notes, including answer keys and tapescripts See accompanying Teacher's Book.

**English for the Energy Industries: Oil, Gas and Petrochemicals** English for the Energy Industries is a foundation English course for employees in the oil, gas and petrochemicals industries. It is aimed at pre- and low-intermediate level students who have a basic grasp of English, but who need to use technical and semi-technical vocabulary within specific functional language applicable to the workplace. It provides approximately 140 hours of listening, speaking, reading, writing and language practice activities. English for the Energy Industries focuses on high-frequency lexis and structures used in the work environment, such as the language of safety, instructions, descriptions of equipment, processes and systems. English for the Energy Industries develops the four language skills in English for Specific Purposes (ESP) contexts: Reading: uses authentic texts that energy industry technicians will use in everyday life, such as instruction manuals. Speaking and listening: communicative pairwork tasks practise real-life communication situations, such as describing and giving information about equipment and jobs, giving instructions and warnings and discussing workplace problems. Writing: tasks motivate students by developing knowledge of useful language for different text types, such as accident report forms and written notes and instructions. A comprehensive Glossary provides clear explanations of approximately 160 key terms in common use in the energy industries. Key Features Essential expressions and language used in the industry Constant recycling of high-frequency technical terms and vocabulary Real-life listening and reading texts A communicative approach to oral accuracy and fluency Over 140 hours of skills practice activities A glossary of over 160 key terms View accompanying audio CDs and Teacher's Book.

'Technical English' provides English language instruction for students who are involved in vocational and technical education. The course contains the core language and skills which are common to a range of industrial specialisations. It presents key technical concepts concisely with labelled illustrations.

**Career Express Level B2 Course Book** Career Express Business English B2 is the first part of a two-level multimedia course, for students on a Business English language course at university level. It offers a wealth of material and enables you to learn the communication skills you need to be successful in the globalized world of business. Reading -The texts focus on the most interesting topics from the world of business. They provide the springboard for a discussion of contemporary business issues. Listening -Realistic conversations, presentations and lectures expose you to a variety of native and non-native speaker accents and help you to develop core listening comprehension skills. Business Skills -This section introduces you to the skills most needed in business, such as taking part in meetings, using diplomacy at work, describing charts and presenting products. Discussion and Role-Play -These features give you the opportunity to pick up on issues raised in the reading and listening sections, and to practise functional language. Company Case -These task-based case studies have been inspired by real business scenarios. They require you to work in teams, find strategic solutions to real-life problems and present them to the class. Audio CDs -Complete recordings for all the listening activities in the Course Book. Career Express Self Study Online -This website offers an abundance of additional material: Electronic Workbook with interactive practice exercises to consolidate vocabulary, grammar, reading and skills Self-assessment tests for each unit Tailor-made videos with interactive exercises The complete Course Book listening material as MP3 downloads
