Written by worldwide experts, World Clinics in Ophthalmology are periodicals containing evidence-based reviews on disease management, techniques, procedures and technology. These periodicals will be published on a biannual basis. Volume One is a concise review of glaucoma diagnosis and management. Each chapter offers a clear understanding of each operation and includes didactic photographs, illustrations and case studies. Topics covered include laser treatment, optical coherence topography and surgical procedures including ab-externo trabeculectomy and non penetrating surgery for glaucoma. A clinical evaluation of diagnosis and management techniques for primary open angle glaucoma is also provided.

Postpartum haemorrhage is excessive bleeding after childbirth. The most common cause is the separation of the placenta from the uterus, but other causes include cervical lacerations, a large episiotomy or a ruptured uterus. Part of the World Clinics: Obstetrics & Gynecology series, this new volume is a comprehensive guide to postpartum haemorrhage. Beginning with a list of useful abbreviations, the book covers both primary and secondary causes of the condition, describing both surgical and non-surgical management techniques. With contributions from many UK-based specialists, this manual includes WHO (World Health Organisation) and FIGO (International Federation of Gynecology and Obstetrics) protocols and recommendations. Key points New volume in World Clinics: Obstetrics & Gynecology series Covers surgical and non-surgical treatment of primary and secondary causes of postpartum haemorrhage Includes WHO and FIGO protocols and recommendations Many UK-based contributors

Preterm or premature birth is the largest contributor to newborn deaths and its incidence is rising globally. Part of the World Clinics: Obstetrics & Gynecology series, this book discusses the causes and management of preterm labour. Each chapter examines contributing causes of the condition, including infection, treatment for pre-cancer of the cervix, uterine factors and artificial reproductive technologies (ART). The role of ultrasound is also discussed. Authored by specialists in Europe, the USA and Asia, this concise guide includes 25 full colour images and illustrations to enhance learning. Key points Discusses causes and management of preterm labour Examines different causes from disease and infection, to ART Authored by specialists in Europe, the USA and Asia Part of the World Clinics: Obstetrics & Gynecology series – previous editions - Recurrent Miscarriage published October 2011 and Endometriosis published July 2012

"Through interviewing the managers and core volunteers of each clinic, this book aims to describe fifteen SRFCs located in the United States, one in Canada, one in Australia, one in South Africa, and one in China"--Introduction.

This book is the latest volume in the World Clinics Diabetology series, focusing on complications associated with diabetes. Divided into 13 sections, the first chapters discuss complications in different organs and body systems, including the musculoskeletal system, liver, skin, lungs, ear, nose and throat, and more. The following sections cover stroke and diabetes, screening for diabetic retinopathy, errors in insulin treatment, routine investigations for complications, and diabetic kidney injury. The comprehensive text is enhanced by more than 160 images and illustrations, and each article is followed by a comment from the editors highlighting the key points of the topic. Key points Latest volume in World Clinics Diabetology series Covers complications associated with diabetes in various organs and body systems Each article concludes with a comment from the editors highlighting key points Highly illustrated with clinical photographs and figures

Pain Management is the first volume in the World Clinics: Anesthesia, Critical Care & Pain series. It presents evidence-based reviews of current protocols in the management of pain. Beginning with an overview of pain and its mechanisms, the following sections examine different sources of pain and approaches for its management. Both acute and chronic pain are covered, as well as pain management in children and the elderly. Separate chapters are dedicated to non-pharmacotherapeutic management techniques including physiotherapy and yoga. With contributions from recognised international experts, this volume includes more than 100 full colour clinical photographs, illustrations and tables. Key points First volume in World Clinics: Anesthesia, Critical Care & Pain series Presents evidence-based reviews of current protocols for pain management Covers acute and chronic pain and non-drug therapies Contributions from experts in the UK, USA, Europe and Asia Includes more than 100 full colour photographs, illustrations and tables

The World Clinics: Pulmonary and Critical Care Medicine series brings pulmonary specialists fully up to date with the latest developments in different branches of respiratory medicine. This first manual focuses on pneumonias. Beginning with an introduction to the epidemiology and risk factors of pneumonia the following chapters discuss diagnosis and treatment of different strains of pneumonia in adults and children. Pneumonia in immune-suppressed patients, community acquired and zoonotic (transferrable between species) pneumonias are also covered. More than 80 full colour images and illustrations are included to enhance learning. Key points Brings pulmonary specialists up to date with latest developments in diagnosis and treatment of pneumonias Discusses different strains in both adults and children Covers pneumonia in immune-suppressed patients, community acquired and zoonotic pneumonias Includes more than 80 full colour images and illustrations

Part of the World Clinics: Obstetrics & Gynecology series, this new volume presents clinicians and trainees with the latest developments in the diagnosis and management of polycystic ovary syndrome (PCOS). Beginning with an introduction to the pathophysiology and diagnosis of the condition, the following sections discuss associated disorders including menstrual abnormalities, obesity and metabolic syndromes, fertility problems, pregnancy complications, depression and anxiety, and more. Presented as a collection of evidence-based reviews, each article is enhanced by photographs and figures, and concludes with a summary and comments by the editors highlighting their own clinical experience. Other volumes in the series include: Endometriosis, Recurrent Miscarriage, Contraception, Ovulation Induction, Perimenopausal Health, Postpartum Hemorrhage, Preeclampsia, and Preterm Labor. Key points Latest volume in the World Clinics: Obstetrics & Gynecology series Presents latest advances in the diagnosis and management of PCOS and associated disorders Each article concludes with a summary and comments by the editors Enhanced by photographs and figures throughout

World Clinics: Obstetrics and Gynecology - Perimenopausal Health, Volume 4, Number 1 is the latest issue in the World Clinics: Obstetrics and Gynecology series. Other topics in the series include endometriosis, recurrent miscarriage, contraception, postpartum haemorrhage, and preterm labour. Enhanced by images and illustrations throughout, World Clinics: Obstetrics and Gynecology - Perimenopausal Health, Volume 4, Number 1 is an essential update for obstetricians, gynaecologists and trainees.

Part of the World Clinics: Anesthesia, Critical Care & Pain series, this book presents evidence-based reviews of current protocols in the management of labour and delivery using analgesia and/or anaesthesia.
