One of the roles of a hospice social worker is to advocate for the patient's wishes. Many people are not educated about end-of-life issues, including decisions about CPR (resuscitation) and DNR (Do Not Resuscitate) orders. For example, patients may be unaware of their rights to elect against treatment that may prolong a painful dying process.

This book addresses this relationship between the professions of social work and law and helps social workers develop the knowledge necessary to practice in a legal environment. The author focuses on how the law affects the day-to-day practice of social work; the creation, administration, and operation of social service agencies; and the ways in which social workers and attorneys collaborate to serve the public.

This publication addresses the extent to which social work curricula in Kenya prepares graduates to handle issues of poverty and social development, the specific knowledge and skills that they are equipped with an existing gaps therein. In addition, the challenges that confront the training and practice of social workers and what needs to be done to ensure

that there is an enabling environment for social work education and practice in the country have also been addressed. The publication, which is the outcome of a study on the promotion of professional social work towards social development and poverty reduction in East Africa, analyses the role that professional social work plays in the efforts to reduce poverty, enhance social development and realise the Millennium Development Goals (MDGs) in Kenya. Consequently, emphasis has been laid on the status of professional social work education and practice in preparing social workers to address issues of poverty and MDGs in the country. Cross cutting gender issues that impact on social work education and practice which in turn affect the efforts to address poverty in Kenya have also been analysed. Given that the time span for MDGs was to end in 2015, the authors envisage that the lessons learnt through this study, and the gains made with regard to MDGs should not end in the set time span but rather, that social work educators and practitioners, together with other stakeholders in policy formulation and implementation, still have more to do in making sure that these gains are consolidated into social work training and practice, with additional efforts being made towards sustainable poverty reduction efforts in Kenya.

Global social transformation calls for global social action. 2010 saw the launch of The Global Agenda for Social Work and Social Development, which detailed how social workers can strive to bring about increased social justice. The time is right to start to address and demonstrate the actions that might be required to develop and accomplish the Agenda - with regard to methods in practice and research, in social policy and social work education, and in a broader discourse of global commitment and cooperation. This informative and incisively written edited collection brings together experts from around the world to discuss issues which the social work and social welfare sectors face every day and to ensure a closer link between evidence-based practice, policy objectives and social development goals. Furthermore, this book reveals how these may affect the conditions of people and demonstrate how the social work and social development community can contribute to sustainable development.

'I can say without equivocation this text is without doubt the best book about social work I have read. Chris Beckett explores the purpose, values activities and theories of social work in an ever-changing social context that is clearly identified and examined' - Stephanie Petrie, University of Liverpool Every day social workers face decisions that will significantly impact others' lives, and it is essential that these practical assessments are supported by a sound understanding of social work theory. In this innovative and highly accessible textbook Chris Beckett explains how an understanding of these theoretical issues can improve the knowledge and skills base of professional practice. Essential Theory for Social Work Practice is an engaging and readable text, with a distinctively realistic and honest approach to the realities of everyday practice. Framed in a comprehensive and logical structure: - Part 1 establishes what social workers do and the tools they need - Part 2 considers how to assess, handle, and support change in others - Part 3 explores the wide range of roles that social workers must fulfil - Part 4 strengthens these links between theory and practice. Exercises, case examples, chapter summaries, and practice notes are used to great effect in each chapter, enabling students to apply theory to practice as they progress through the book. The book is an invaluable core text for all undergraduate social work students, and offers excellent support for practitioners in their every day practice.

Social Workers play a critical role in emergency medical settings and their presence has been associated with a decrease in inappropriate emergency room use, and with a reduction in initial and repeated emergency room visits related to psychosocial stressors. However, the discussion continues—especially among emergency room professionals from other disciplines—as to whether social workers truly belong in the emergency setting. In the wake of these debates, many hospital social work departments around the country have been closed. This study qualitatively examined the perceptions of the role of the social worker in a Level 1 Trauma center setting from a multidisciplinary perspective with the use of ethnographic research methods. Three main constructs were explored: Role of the Social Worker, Function of the Social Worker and Value of the Social Worker within the ER Culture. To date, previous studies on role perception in this arena have been done quantitatively.

This book describes what it is like to be a social worker in a range of different settings in different countries. While many of the narratives are from practitioners and educators who either grew up in the UK, half of the narratives explore the experiences of social workers and educators working in different parts of the world in countries as diverse as Australia and New Zealand, India and Bangladesh, Ireland, Sweden and Eastern Europe, Nigeria, the USA and Canada.

Communication in Social Work focuses on the role of communication in social work. This book discusses aspects of communication in the helping process and illustrates where information and advice on their own would not have been helpful to the client. Comprised of seven chapters, this book begins with an overview of the nature of communication and explains why a study of the communication process may help in dealing with serious problems of the environment and human relations. Attention then turns to communication processes in social work, with emphasis on the role of non-verbal behavior in the interaction between social worker and client, along with the factors that influence communication between them. The chapters that follow focus on social factors in communication, considering the sociological view of social work as a mechanism of social control, as well as the importance of communication in the helping process. This book concludes by explaining how social agency contributes to the nature of the social worker's activities, touching on topics such as problems of cooperation and coordination in social welfare. This text will be of interest to professionals and policymakers involved in social work.

Dr David Wilkins is a Senior Lecturer at the University of Bedfordshire, UK. Dr Godfred Boahen is a Policy and Research Officer at the British Association of Social Workers (BASW), UK. How can social workers develop their critical analysis skills? What role does critical analysis play in the day-to-day activities of a social worker? And can we critically analyse in isolation? The ability to analyse contexts, scenarios and service users through a critical lens is vital to effective social work practice. Despite this, many social workers attempt to

analyse situations alone, missing marks of significance. This book, written by two senior academics and practitioners who, at the time, were in the midst of their PhDs, offers a basis step-by-step model that busy social workers can use to develop a more critical and analytical mindset. It shows how analysis can be woven throughout the whole process of social work engagement, resulting in more effective decision-making, more efficient ways of working and, ultimately, better outcomes for social work service users. This is achieved by ways of handy tools, case studies and dilemmas, research summaries, and exercises and reflections points to tackle alone or with a colleague. Topics covered include: What analysis is, and why it is such an important skill in social work practice. The skills that underpin critical analysis, such as time management, planning, critical understanding, logical thinking, research-mindedness, creativity, communication, reflection and hypothesising. The role of emotion and intuition in critical analysis. The importance of supervision and team or supervised analysis. *** This book forms part of the Social Work Skills in Practice series. The series focuses on key social work skills required for working with children and adult service users, families and carers. The books offer both theoretical and evidence-informed knowledge, alongside the application of skills relevant for day-to-day social work practice. They are an invaluable resource for pre-qualifying students, newly-qualified social workers, academics teaching and researching in the field, as well as social work practitioners, including practice educators, pursuing continuous professional development. *** 'A timely and appropriate post-Munro book for social workers at all levels of experience. The chapter on emotion, intuition and critical analysis is a particularly welcome addition to the subject. A really useful book.' Dr Jane Reeves, Director of Studies, M.A. Child Protection, Co-Director Centre for Child Protection, University of Kent, UK

Scientific Essay from the year 2019 in the subject Social Pedagogy / Social Work, University of Benin, language: English, abstract: One unique feature of the social work profession is the centrality of the person-in environment perspective. The purpose of this study is to examine the nature of social work services to internally displaced persons (IDPs). This research is a qualitative study, conducted with 15 social workers in Nigeria. Data were collected through a semi-structured interview with the participants in Abuja. Results show that social work services are largely inadequate to address the broad range of needs, issues, and concerns of displaced persons. Feasible suggestions that consider the intersectionality between people and their social environment are offered to social workers.
