English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Teaching English Language Variation in the Global Classroom offers researchers and teachers methods for instructing students on the diversity of the English language on a global scale. A complement to Devereaux and Palmer ' s Teaching Language Variation in the Classroom, this collection provides real-world, classroom-tested strategies for teaching English language variation in a variety of contexts and countries, and with a variety of language learners. Each chapter balances theory with discussions of curriculum and lesson-planning to address how to effectively teach in global classrooms with approaches based on English language variation. With lessons and examples from five continents, the volume covers recent debates on many pedagogical topics, including standardization, stereotyping, code-switching, translanguaging, translation, identity, ideology, empathy, and post-colonial and critical theoretical approaches. The array of pedagogical strategies, accessible linguistic research, clear methods, and resources provided makes it an essential volume for pre-service and in-service teachers, graduate students, and scholars in courses on TESOL, EFL, World/Global Englishes, English as a Medium of Instruction, and Applied Linguistics.

How can English language teachers contribute to peace locally and globally? English language teachers and learners are located in the global civil society — an international network of civil organizations and NGOs related to human rights, the environment, and sustainable peace. English, with its special role as an international language, is a major tool for communication within this network. On the local level, many teachers are interested in promoting reconciliation and sustainable peace, but often do not know how to do so. This book provides information, analysis, and techniques to help teachers around the world take action toward this goal. Balancing, in a readable and accessible way, the global and the local, core and periphery, cultural diffusion and resistance, theory and practice, pessimism and optimism, outsider and insider perspectives, the expert role and the apprentice role, and prescriptive and elictive methods, it offers an alternative to literature about critical applied linguistics, globalization, and peace education that is simply too complex and wordy to spread easily from the theoretician to the classroom teacher. The English Teacher in Global Civil Society synthesizes threads from many fields and topics into a coherent and empowering argument for the activist role English language teachers can take to promote social change draws on humanistic education, peace education, cross-cultural understanding, problem-posing, cooperative learning, and critical thinking methodologies to help English language teachers learn how to teach conflict resolution skills in their classrooms covers issues in critical applied linguistics, approaches and methodologies in ESL/EFL, global and local curricular issues, and specific skill areas such reading, writing, and speaking suggests a new goal for English language teachers: global citizenship. This engaging, informative, provocative, and highly readable book is a welcome resource for English language teacher trainers, pre-service teachers, practicing classroom teachers, and Peace Corps workers around the world.

This is a groundbreaking Reader which includes specially commissioned pieces as well as classic texts and provides a global perspective on the changing uses and forms of English and its impact on language teaching contexts.
